Chapte	er 3 Test Review Name:Period: Date:
	Your test is on
	Your test covers: atoms, isotopes, ions, average atomic mass, and moles.
1.	Identify the element with 2 protons.
2.	1 mole of helium has more/less equal to the number of atoms of 1 mole of nitrogen?
3.	JJ Thomsen discovered the
4.	Rutherford discovered the and the
5.	discovered the neutrons.
6.	What is Avogadro's number?
7.	The number of atoms in one mole of lead is
8.	Why is an uncharged atom electrically neutral?
9.	Calculate the number of protons, neutrons and electrons in a neutral atom of zinc-67.
10	. An atom of sodium has 11 protons and 12 neutrons. What is its mass number?
11	. The atomic mass on the periodic table is the average atomic mass for all the known
	of that element.
12	A certain atom has 7 protons and 7 neutrons in the nucleus. This atom is an isotope of the
	element
13	A certain atom has 35 protons and 48 neutrons in the nucleus. Write the isotope name and isotope
	notation for this isotope.
	. Who conducted the gold foil experiment?
15	. His gold foil experiment led to the discovery of,
16	. The mass of an atom is concentrated in the, but the majority of the volume
	an atom is located in the
17	A positively charged subatomic particle is called a
18	A subatomic particle with no charge is called a
19	. A negatively charged subatomic particle is called a/an
20	. What are the relative masses of all three subatomic particles?
21	All isotopes of carbon contain protons.
22	. How many moles of hydrogen are in 6.2 grams of hydrogen?

of

23. Define isotope:

24. How many protons, neutrons, and electrons are in a  $Ca^{2+}$  ion?

25. How many protons, neutrons, and electrons are in a  $P^{-4}$  ion?

- 26. How many atoms are present in 8.5 mol fluorine atoms?
- 27. Calculate the number of moles in 22 grams of hydrogen.
- 28. Calculate the number of atoms in 68.2 grams of potassium.
- 29. Element X has two naturally occurring isotopes. X-80 is 25% abundant. X-82 is 75% abundant. Calculate the average atomic mass of element X.
